Presentation trays

lineoplus

Create the perfect counter with LINEOPLUS !

The extensive choice of trays, bowls and special shapes allows you to put together the most diverse arrangements and presentations. A counter can always be realised according to one's own creativity or optimised according to the available display space.

With Lineoplus, you enjoy many advantages:

- ✓ a complete range
- ✓ the best product quality
- ✓ always food-grade materials
- ✓ aesthetic and durable
- ✓ 100% recyclable

GENERAL

FINISHING TYPES

PMMA plexi is available in 2 versions : high gloss or matte ("smoke").

high gloss

matte (smoke)

OPTIONS

A bottom grid and/or lid is available for several references.

bottom grid

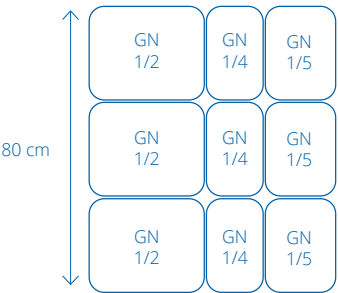

transparent lid

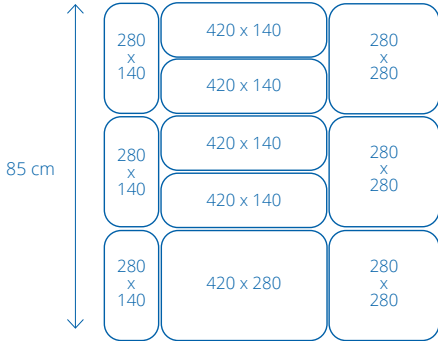

SETUPS

Depending on the depth of your counter, you can opt for different series that will provide you with a perfectly finished and structured counter.

Series Gastro: gastronorm dimensions

Series 28: built according to dimension 280 mm

LET'S MEAT

PMMA PLEXI TRAITEUR

Lineoplus' Traiteur range is the ideal choice for a high-quality presentation. It includes a wide range of BPA-free, food approved ('EU 10/2011' and 'EU 202/2014') dishes. The dishes are made of PMMA, which is a high-quality, durable material. They are scratch-resistant, colourfast and not sensitive to discolouration. The conical shapes ensure a strong, stable product with perfect cold flow in refrigerated counters. The dishes are temperature-resistant from -20°C to +70°C and available in a high-gloss version and in a matte version (smoke). Moreover, they can be cleaned in the dishwasher. However, they are not suitable for (microwave) oven or bain-marie.

Colour codes : ☐ 010 white ☐ 020 black ☐ DS 021 dark smoke ☐ WS 011 white smoke

IT'S A PIECE OF CAKE

PMMA PLEXI BREAD & PASTRY

Lineoplus' 'Bread & Pastry' range includes 2 types of dishes. On the one hand there are the elegant 'smoke' dishes in resistant plexi (PMMA) for bread and pastry which are both food-safe (EU 10/2011) and BPA-free. On the other hand, there are the powder-coated aluminium dishes with food safe certificate CE1935/2004. These feature 4 bevelled edges and are available in white or black matt smoke version. Both types are not allowed in the (microwave) oven and cannot be used for bain-marie either. They are dishwasher-proof and temperature-resistant from -20°C to +70°C.

- powder coated aluminium
- white or black matt smoke version with 4 bevelled edges
- food safe certificate CE1935/2004
- dishwasher-safe
- not suitable for oven
- recyclable material

CHOCOLATE MAKES EVERYBODY HAPPY

ALUMINIUM CHOCOLATES & PASTRY

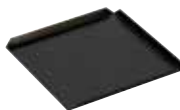

Lineoplus' 'Chocolates & Pastry' range also includes 2 types of plates. On the one hand, there are the 1 mm thick anodised aluminium trays that guarantee an attractive and neat presentation of all your chocolate and bakery products. These anodised dishes are also available in 2 series. Series BSO (with food safe certificate) features 4 straight corners and edges, while series BSE features double folded edges for extra sturdiness. On the other hand, there are the matt aluminium trays that are extremely strong for bread and pastries. The 'Chocolates & Pastry' dishes should not be placed in the (microwave) oven.

WHAT'S YOUR SECRET INGREDIENT?

INOX / ABS CATERING & PREPARATION

In the Lineoplus 'Catering & Preparation' range, there are 2 types of stainless steel countertop trays. Series LIP with mirror effect ensures perfect cold conduction to the food and preparations on display. For the perfect combination of elegance and functionality, the LIM range of shiny stainless steel trays includes different shapes and sizes to optimise any space. Besides the stainless steel trays, there are the BPA-free synthetic preparation trays in ABS (Series LOG). This type has a wide temperature range, making them multi-purpose trays for processing preparations or presenting fresh meat or other food.
