to order the opening of automatic sliding doors

Presentation of the
5000 Serie Kits

>>>>

PNEUMATIC FOOT CONTROL

61898

Foot control for the opening of the door.

Air pressure control element generating a signal to open the door.

>>>>

RADIO REMOTE CONTROL

Personal use transmitter for opening one to several doors.

Mains-powered receiver, operating with a battery powered transmitter that commands the opening control.

Compact model

61496

NEW

Industrial model

61494

>>>>

CONTACTLESS SWITCH

Movement detector without contact

IP65 waterproof version.

61892

61896

A hand movement in front of the detector activates the door opening.

>>>>

OPENING SENSOR

Door opening detector for pedestrians.

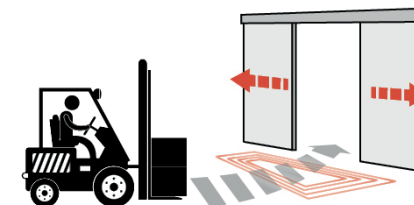

58509

Based on microwave technology, it detects movements of a minimal speed of 5cm/sec. within defined area, thus activating the door opening.

>>>>

MAGNETIC LOOP

Vehicles detector controlling the automatic opening of the door.

58657 - 65273

Loop implanted within the ground allowing the magnetic detection of vehicles to control the door opening.
